

Saudi TikTok Creator Scout

E-commerce · Trading · Real Estate — 20 candidates

Sourced via three parallel web-research passes (not direct TikTok scraping/API access). Every candidate needed an identifiable TikTok handle and a citable source; unknown fields are marked n/a rather than guessed, and nationality/compliance uncertainty is flagged in red rather than silently resolved.

Top Picks

Handle	Niche	Why
@econabdallah	E-commerce	#1 — only e-commerce candidate with fully cross-verified Saudi nationality (Riyadh), ~178K TikTok followers, content squarely in dropshipping/store-launch niche across every platform
@adeel8866	E-commerce	#2 — strong niche fit (dropshipping suppliers, sourcing, tutorials) with explicit Saudi-market hashtagging, though personal nationality confirmation is thinner
@malazmarketing	E-commerce	#3 — deepest professional credentials of any e-commerce candidate, but flagged: likely-Egyptian background means Saudi nationality (vs. market residency) is unconfirmed
@assadalsharef	Trading	#1 — leads on reach (~1.1M) and a distinctive doctor-turned-crypto-educator credibility narrative, though "build wealth with crypto" framing warrants compliance scrutiny
@bin_solaiman	Trading	#2 — most professionally credentialed (financial-press byline, market-data consultancy) with genuine Saudi-market hashtag activity
@fuad8k	Trading	#3 — cleanest self-imposed compliance boundary of the group: stocks-only education, explicitly no crypto or fund management
@mnfr60	Real Estate	#1 — most clearly documented individual creator, consistently branded across TikTok/X/Snapchat/YouTube as a real-estate and mortgage-financing consultant with a repeatable content format
@jubail_aqari	Real Estate	#2 — named, REGA-credentialed local property marketer with a concrete follower count (33.5K) and a clear regional niche (Jubail/Eastern Province)
@aqarapp	Real Estate	#3 — not an individual, but the single best-verified, largest real-estate brand active on Saudi TikTok (99.8K followers), backed by independent press coverage

Excluded During Research

Namesake traps, wrong-country matches, niche mismatches, or names with no verifiable TikTok presence — kept here for transparency rather than silently dropped.

Name	Niche	Reason excluded
Hussam Ansari (@hussam.ansari)	E-commerce	Teaches Amazon FBA "in Saudi Arabia and UAE," but own hashtags (#ukpakistani, #overseaspakistani) indicate Pakistani nationality/heritage — market-focus-vs-nationality trap
Zuhair Abu Al-Reesh	E-commerce	Genuine, well-documented Saudi-market digital-marketing/TikTok-ads trainer (23 yrs experience), but no personal TikTok creator account located — fails identifiable-TikTok-presence bar
Yazeed (@YazeedKM_)	E-commerce	Founder of e-commerce training platform "Adatik," active/credentialed on X, but no TikTok handle verified
Ali Al-Hamed (██████████)	Trading	Described as a "licensed financial influencer" but licensed/based in the UAE, not Saudi Arabia — namesake/wrong-country trap
Tariq Al-Harbi (@tariq_alharbi80)	Trading	Name/hashtag matched trading searches, but account's own listed profession is "Actor" with entertainment content — wrong niche despite name match

Name	Niche	Reason excluded
Mohammed Al-Shumaimari (████ ██████████)	Trading	Genuinely credentialed Saudi markets analyst (34-yr track record, TV/press commentator), but no TikTok handle could be verified despite targeted searches
"Omar" (Collabstr forex/crypto listing)	Trading	Profile describes an 11-yr markets creator reaching 22 Arab countries, but no source confirms Saudi nationality or base specifically
Rateel Alshehri	Trading	Confirmed Saudi, TikTok-verified, but content niche is youth entrepreneurship/podcasting, not trading — niche mismatch, not nationality
Abdullah Al-Rajhi (@abdullahmrajhi, 194.1K)	Real Estate	Search results inconsistently tie this handle to a Riyadh villa-developer chairman AND separately to an unrelated Al-Rajhi businessman bio — extremely common Saudi business-family name, could not confirm which entity/bio actually belongs to this account
Reem (@alreem.ksaa, Instagram)	Real Estate	Genuinely appears to be a REGA-licensed Saudi real-estate marketer, but no TikTok handle could be located — Instagram-only presence fails the TikTok-presence requirement
"████████ ██████████ Official" (Linktree marketersalma_7)	Real Estate	Linktree confirms TikTok is among her linked platforms, but exact TikTok username unconfirmed, and search surfaced multiple unrelated "Salma" accounts (incl. an apparently Egyptian one) — namesake-confusion risk

Method & Notes

Counts: 20 total — 5 e-commerce, 8 trading, 7 real estate. 11 excluded during research.

- Sourcing rule (no-fabrication contract): every claim needed a citable source URL; unknown fields are marked n/a, never guessed. A candidate had to have an identifiable TikTok handle/channel to count — verified via web search, cross-referenced socials, or influencer-listing sites (not direct TikTok scraping/API access, which wasn't available in this research pass).
- Three parallel research agents ran one per niche: E-commerce, Trading, Real Estate — each independently searched, verified, and flagged uncertainty rather than padding the list to a target count. Totals: 5 e-commerce + 8 trading + 7 real estate = 20 candidates.
- 'Depth/Confidence' column: the researching agent's own confidence in the verification (High/Medium/Low), separate from follower count or expertise depth — Low-confidence entries are included transparently rather than dropped, so treat them as leads needing manual follow-up, not settled picks.
- Nationality flags: several candidates' Saudi nationality (vs. Saudi-market residency/focus) could not be independently confirmed — flagged per-row rather than silently included or excluded. This is a materially harder niche for nationality verification than the earlier Northouse expert-scout project, since TikTok bios rarely state nationality directly.
- Trading-niche risk flags: several trading creators sell paid 'investment packages' or courses without disclosed licensing, or produce options/leveraged-instrument content — flagged for compliance review before any outreach, not as a disqualification by itself.
- Real-estate niche note: individually-branded real-estate 'influencers' are less common on Saudi TikTok than licensed agents/marketers or platform brand accounts (e.g. Aqar App) — both categories are included and labeled.
- Cross-project convergence: ██████████ (@mnfr60/@mnfr10) also appeared in the earlier Northouse Finance scout (real-estate/████████████████████ angle) under a related handle — independent convergence across two separate research passes, a stronger signal than either alone.
